

INDEX OF AUTHORS

VOLUME XXXVII

TRANSACTIONS OF AMERICAN SOCIETY FOR METALS

1946

A		M	
Arner, L. H.	309	McAdam, D. J., Jr.	497, 538
C		Mebs, R. W.	497
Cutton, J. G.	110	Meinhart, W. L.	360
D		N	
Dowdell, Ralph L.	245	Niconoff, D.	337
E		O	
Espey, George	449, 468	Oster, Harold	567
F		P	
Falk, Benjamin	192	Paschkis, Victor	216
Fine, Morris E.	245	Patterson, Vernon H.	278
G		Pennington, W. A.	48
Garvey, T. M.	136	R	
Geil, G. W.	497	Rowland, E. S.	27
Grange, R. A.	136	S	
H		Sachs, George	449, 468
Hughes, M. A.	110	Schwartz, H. A.	309
I		T	
Iannone, B. Nicholas	278	Troiano, Alexander R.	402
J		V	
Johnson, H. H.	309	Vadeboncoeur, James O.	303
K		W	
Kahn, Walter	567	Wachtell, Richard	567
Kasik, G. B.	449	Wolfe, K. J. B.	1
L		Z	
Lyle, S. R.	27	Ziegler, N. A.	360
Lyman, Taylor	402		

INDEX OF SUBJECTS AND AUTHORS OF PAPERS

VOLUME XXXVII

TRANSACTIONS OF AMERICAN SOCIETY FOR METALS

1946

A

Aluminum Alloy 75S; Forming of the—By <i>George Sachs and George Espey</i>	468
Aluminum Alloys; Hot Roll Forming of Various—By <i>George Sachs, George Espey and G. B. Kasik</i>	449
Annealed Hypoeutectoid Steels; Graphite in Cold-Rolled Subcritically—By <i>M. A. Hughes and J. G. Cutton</i>	110
Application of Ms Points to Case Depth Measurement—By <i>E. S. Rowland and S. R. Lyle</i>	27
Austenitic Grain Size and McQuaid-Ehn Carburizing Characteristics; Relationship Between the Deep Drawing Properties of Autobody Sheet—By <i>K. J. B. Wolfe</i>	1
Autobody Sheet, Its Austenitic Grain Size and McQuaid-Ehn Carburizing Characteristics; Relationship Between the Deep Drawing Properties of—By <i>K. J. B. Wolfe</i>	1

B

Boron-Treated Steels; Factors Affecting the Hardenability of—By <i>R. A. Grange and T. M. Garvey</i>	136
--	-----

C

Carbon Content Upon the Transformations in a 3 Per Cent Chromium Steel; Influence of—By <i>Taylor Lyman and Alexander R. Troiano</i> ..	402
Case Depth Measurement; The Application of Ms Points to—By <i>E. S. Rowland and S. R. Lyle</i>	27
Cast Chromium-Molybdenum Steels; Effect of Nickel on Physical Properties and Thermal Characteristics of Some—By <i>N. A. Ziegler and W. L. Meinhart</i>	360
Cast Steel at Room Temperature; Gas Evolution from—By <i>H. H. Johnson, L. H. Arner and H. A. Schwartz</i>	309
Chromium-Molybdenum Steels; Effect of Nickel on Physical Properties and Thermal Characteristics of Some Cast—By <i>N. A. Ziegler and W. L. Meinhart</i>	360
Chromium Steel (3 Per Cent); Influence of Carbon Content Upon the Transformations in a—By <i>Taylor Lyman and Alexander R. Troiano</i> ..	402
Cobalt Magnet Steel (36 Per Cent); Mass Temperature Effects on Quenching—By <i>Benjamin Falk</i>	192
Cold-Rolled Subcritically Annealed Hypoeutectoid Steels; Graphite in—By <i>M. A. Hughes and J. G. Cutton</i>	110
Cold Working and Heat Treatment of a 10-Carat Gold Alloy—By <i>Vernon H. Patterson and B. Nicholas Iannone</i>	278
Combined Stresses and Low Temperatures on the Mechanical Properties of Some Nonferrous Metals; Effects of—By <i>D. J. McAdam, Jr., G. W. Geil and R. W. Mebs</i>	497
Combined Stresses; Fracture of Metals Under—By <i>D. J. McAdam, Jr.</i> ..	538
Corewashes; Tellurium—By <i>James O. Vadeboncoeur</i>	303
Critical Points of S.A.E. 4340 Steel as Determined by the Dilatometric Method—By <i>D. Nikonoff</i>	337

D

Decarburization of Steel; Mechanism of the Surface—By <i>W. A. Pennington</i>	48
Deep Drawing Properties of Autobody Sheet, Its Austenitic Grain Size and McQuaid-Ehn Carburizing Characteristics; Relationship Between the—By <i>K. J. B. Wolfe</i>	1
Dilatometric Method; Critical Points of S.A.E. 4340 Steel as Determined by the—By <i>D. Nikonoff</i>	337

E

Effect of Nickel on Physical Properties and Thermal Characteristics of Some Cast Chromium-Molybdenum Steels—By <i>N. A. Ziegler and W. L. Meinhart</i>	360
Effects of Combined Stresses and Low Temperatures on the Mechanical Properties of Some Nonferrous Metals—By <i>D. J. McAdam, Jr., G. W. Geil and R. W. Mebs</i>	497

F

Factors Affecting the Hardenability of Boron-Treated Steels—By <i>R. A. Grange and T. M. Garvey</i>	136
Failure of 18-8 Stabilized Stainless Steel; Investigation of a Type of—By <i>Walter Kahn, Harold Oster and Richard Wachtell</i>	567
Forming of the Aluminum Alloy 75S—By <i>George Sachs and George Espey</i>	468
Fracture of Metals Under Combined Stresses—By <i>D. J. McAdam, Jr.</i> ...	538

G

Gas Evolution from Cast Steel at Room Temperature—By <i>H. H. Johnson, L. H. Arner and H. A. Schwartz</i>	309
Gold Alloy (10-Carat); Cold Working and Heat Treatment of—By <i>Vernon H. Patterson and B. Nicholas Iannone</i>	278
Graphite in Cold-Rolled Subcritically Annealed Hypoeutectoid Steels—By <i>M. A. Hughes and J. G. Cutton</i>	110

H

Hardenability of Boron-Treated Steels; Factors Affecting the—By <i>R. A. Grange and T. M. Garvey</i>	136
Heat Treatment and Cold Working of a 10-Carat Gold Alloy—By <i>Vernon H. Patterson and B. Nicholas Iannone</i>	278
Hot Roll Forming of Various Aluminum Alloys—By <i>George Sachs, George Espey and G. B. Kasik</i>	449
Hypoeutectoid Steels; Graphite in Cold-Rolled Subcritically Annealed—By <i>M. A. Hughes and J. G. Cutton</i>	110

I

Influence of Carbon Content Upon the Transformations in a 3 Per Cent Chromium Steel—By <i>Taylor Lyman and Alexander R. Troiano</i>	402
Investigation of a Type of Failure of 18-8 Stabilized Stainless Steel—By <i>Walter Kahn, Harold Oster and Richard Wachtell</i>	567

L

Low Temperatures and Combined Stresses on the Mechanical Properties of Some Nonferrous Metals; Effects of—By <i>D. J. McAdam, Jr., G. W. Geil and R. W. Mebs</i>	497
--	-----

M

Mass Temperature Effects on Quenching 36 Per Cent Cobalt Magnet Steel—By <i>Benjamin Falk</i>	192
McQuaid-Ehn Carburizing Characteristics and Austenitic Grain Size; Relationship Between the Deep Drawing Properties of Autobody Sheet—By <i>K. J. B. Wolfe</i>	1

Mechanical Properties of Some Nonferrous Metals; Effects of Combined Stresses and Low Temperatures on the—By <i>D. J. McAdam, Jr., G. W. Geil and R. W. Mebs</i>	497
Mechanism of the Surface Decarburization of Steel—By <i>W. A. Pennington</i>	48
Metals Under Combined Stresses; Fracture of—By <i>D. J. McAdam, Jr.</i>	538
Ms Points to Case Depth Measurement; The Application of—By <i>E. S. Rowland and S. R. Lyle</i>	27

N

Nickel Effect on Physical Properties and Thermal Characteristics of Some Cast Chromium-Molybdenum Steels—By <i>N. A. Ziegler and W. L. Meinhart</i>	360
Nonferrous Metals; Effects of Combined Stresses and Low Temperatures on the Mechanical Properties of Some—By <i>D. J. McAdam, Jr., G. W. Geil and R. W. Mebs</i>	497

P

Physical Properties and Thermal Characteristics of Some Cast Chromium-Molybdenum Steels; Effect of Nickel on—By <i>N. A. Ziegler and W. L. Meinhart</i>	360
---	-----

Q

Quenching 36 Per Cent Cobalt Magnet Steel; Mass Temperature Effects on—By <i>Benjamin Falk</i>	192
Quenching of Steel Balls and Rings—By <i>Victor Paschkis</i>	216

R

Relationship Between the Deep Drawing Properties of Autobody Sheet, Its Austenitic Grain Size and McQuaid-Ehn Carburizing Characteristics—By <i>K. J. B. Wolfe</i>	1
--	---

S

S.A.E. 4340 Steel as Determined by the Dilatometric Method; Critical Points of—By <i>D. Nikonoff</i>	337
Sheet (Autobody), Its Austenitic Grain Size and McQuaid-Ehn Carburizing Characteristics; Relationship Between the Deep Drawing Properties of—By <i>K. J. B. Wolfe</i>	1
Soft Soldering—By <i>Morris E. Fine and Ralph L. Dowdell</i>	245
Soldering, Soft—By <i>Morris E. Fine and Ralph L. Dowdell</i>	245
Stabilized Stainless Steel; Investigation of a Type of Failure of 18-8—By <i>Walter Kahn, Harold Oster and Richard Wachtell</i>	567
Stainless Steel; Investigation of a Type of Failure of 18-8 Stabilized—By <i>Walter Kahn, Harold Oster and Richard Wachtell</i>	567
Steel Balls and Rings; Quenching of—By <i>Victor Paschkis</i>	216
Stresses; Fracture of Metals Under Combined—By <i>D. J. McAdam, Jr.</i> ..	538
Surface Decarburization of Steel; Mechanism of the—By <i>W. A. Pennington</i>	48

T

Tellurium Corewashes—By <i>James O. Vadeboncoeur</i>	303
Thermal Characteristics and Physical Properties of Some Cast Chromium-Molybdenum Steels; Effect of Nickel on—By <i>N. A. Ziegler and W. L. Meinhart</i>	360
Transformations in a 3 Per Cent Chromium Steel; Influence of Carbon Content Upon the—By <i>Taylor Lyman and Alexander R. Troiano</i>	402
